Office Action Summary	Application No. 10/658,601	Applicant(s) PALMON ET AL.	
	Examiner Thomas D. Lee	Art Unit 2625	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 20 and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 4,575,769 (Arnoldi).

Arnoldi discloses a method of exposing an image comprising: scanning successive exposure lines of said image along a first scanning direction (CCD sensor (column 3, lines 63-67)); and varying a resolution of each exposure line along a second scanning direction (step motor incremented by a sequence of varying step sizes in order to produce a varying scan resolution of each exposure along the direction of document travel (column 6, lines 40-65; Fig. 3)); said first scanning direction differing from said second scanning direction (direction of document travel orthogonal to horizontal scan line (Fig. 3)). Said first scanning direction defines a horizontal exposure of said image and said second scanning direction defines a vertical exposure of said image (horizontal scan line corresponds to first scanning direction defining horizontal exposure of image and direction of document travel corresponds to second direction defining vertical exposure (Fig. 3)).

Allowable Subject Matter

3. Claims 1-19 are allowed.

Art Unit: 2625

4. The following is a statement of reasons for the indication of allowable subject matter: No prior art has been found to disclose or suggest the steps of "supplying each of a plurality of imaging beams with a respective data sequence comprising sections of successive input lines of a digital image, said successive input lines being exposed along a slow scanning direction defined by a horizontal resolution, and imaging at least one exposure line with a variable resolution along said fast scanning direction, wherein the size of said sections is determined by said variable resolution," as recited in base claim 1; and as similarly recited in base claims 5, 8, 12 and 18.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas D. Lee whose telephone number is (571) 272-7436. The examiner can normally be reached on Monday-Friday, 7:30-5:00, alternate Fridays off.
